FOR IMMEDIATE RELEASE

Contact: Paul Kaminski, 01-607-232-2232

**850th Episode of “Radio-Road-Test” will be broadcast on May 21, 2010
Suzuki Kizashi tested in Florida**

Johnson City, NY—The Motor Sports Radio (sm) Network business unit of the PK Communications Co., Johnson City, NY, will reach a broadcast milestone when its 850th episode of “**Radio-Road-Test**” is released for worldwide broadcast on May 21, 2009.

Broadcast host Paul Kaminski said “The Suzuki Kizashi is that company's offering in the mid size mid price auto market segment. The vehicle is sold in front wheel drive and all wheel drive versions. The road test of the front wheel drive model took us through Alligator Alley, central Florida countryside, Sebring, and the Miami to Ft. Lauderdale corridor of South Florida.” Followers of Motor Sports Radio's Twitter page (<http://Twitter.com/MSRnet>) saw a picture of the Kizashi and received some first impressions with “Tweets” during the road test period in mid to late March, 2010.

“**Radio-Road-Test**” is a nationally syndicated weekly radio program of driving impressions of American and foreign cars and light trucks. The program contains performance observations, economy observations, a rundown of safety features, pricing information and general comments on each tested vehicle. It began its run in national and international syndication on January 28, 1993 and is made available to commercial radio stations on a barter basis. “**Radio-Road-Test**” is also heard internationally on the American Forces Radio Network, and also available to listeners by weekly podcast.

Kaminski is the News Director for the Motor Sports Radio Network and also hosts its “**Race-Talk**” weekly program of major league auto racing news, preview, perspective and commentary. More information on the PK Communications Co. and its business units, may be found at its website, msrpk.com.
